25X1 2. The plant was located approximately 1 - 12 km from the western outskirts of the city of Ledec and directly north of the Sazava River Point #1, Enclosure A7. It was nestled in a small valley along the river, and could be easily observed from above. A single track railway line, running from Svetla nad Sazavou (4940N - 1524E) to Zruc and Sazavon (4944N - 1506N) passed the plant to the north. A small railroad station was located approximately 50 meters northwest of The nortion of the plant which had been finished in June 1951 25X1 was one large building constructed of brick and coated the approximate dimensions are shown on the sketch of 25X1 Enclosure B7. An the area explanation of the numbered points on the sketch is given below: Point #1: The main administration building was two stories high and housed all the administrative offices of the plant. Point #2: The workshops section was covered by a flat roof constructed entirely of glass and had several "Khan" type 25X1 *kylights. The loading area measured approximately 50 m x 30 m, Point #32 and was completely concrete surfaced. A long loading platform was located to the west of the loading area. 25X1 Point the The loading platform was constructed entirely of concrete and was approximately 40 m x 3 m, and 12 - 2 m high. It was used only for loading and unloading trucks. 25X1 Point #5: This appeared to be another loading platform Point #6: A branch road from the highway to Ledec which served the factory only, was approximately six meters wide and was partially asphalt surfaced. Point #7: The main entrance was composed of one large entrance plus several smaller gates which were kept closed most of the timee -end-Middle Danube Enclosure (A): 25X1 Tabor Sketch (retouched) of small parts plant Enclosure (B) in Ledec nad Sazavou (4942N - 1517E).
